
Title: Simple Spells - i

Author: Witchcraft

Straight to the nitty
gritty;
Let's learn a couple of
tricks.
We'll start with direct
action,
With mischief thrown into
the mix.
An easy one to start
with;
We'll teach you how to
stall.
With little time and
effort,
You'll start to learn
them all.
Here's a quick one that's
easy to learn;
And I'll give you a little
teaser.
It's as easy as writing
their name on a page,
And popping them into
the freezer.
Soon enough they'll start
to get cold,
Crystals starts to form.
They'll come sluggish,
burdened, slow in their
walk;
They'll crawl as they try
to keep warm.
The coldness increases,
unable to walk;
Their feet: they are
stuck to the floor.
The spell is complete, the
task it is done;
They're frozen and vex
you no more.
